Relationships

users 1 : N item_posts	author of a report
users 1 : N comments	writes comments
users 1 : N reactions	one like/dislike per post+user
users 1 : N ratings	one score per post+user
users 1 : N verification_challenges	OTP audit trail
users 1 : N uploads	file ownership
item_posts 1 : N attachments	photo(s) of the item
item_posts 1 : N comments	discussion

item_posts 1 : N reactions	votes
item_posts 1 : N ratings	scores

Notes: PK = primary key, FK = foreign key, UQ = unique. reactions.UNIQUE(post_id, user_id) and ratings.UNIQUE(post_id, user_id) enforce one vote / one rating per user per post. Deleting an item_post cascades to attachments, comments, reactions and ratings.
